-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 18, 2006 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, 7, 10, 13-16 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawasaki et al (US 2001/0047786 A1). The starter has a rope reel 21 and pulley 31, which is rotatable by way of spring coupling element 15. A sleeve, as claimed, is defined by the cylindrical portions of rope reel 21 and pulley 31 surrounding axle 12.

Claims 1-5, 7, 11, 13-16 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Leasure et al (US 6,782,863 B2). Claims embrace at least the recoil starter

embodiment shown in Figure 10, which includes a rope pulley 86, an engaging element 90 with a sleeve portion, and a spring coupling element 88.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawasaki et al (US 2001/0047786 A1) in view of Forbess (US 2,511,908). Kawasaki et al discloses the claimed invention as stated above except for hardened metal. Forbess teaches that it is known to use hardened components in a recoil starter (column 2, line 27; column 3, line 6). It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the recoil starter of Kawasaki et al of hardened components, as taught by Forbess, in order to make the starter more durable.

Claims 8 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawasaki et al (US 2001/0047786 A1) in view of Uhl (US 5,287,832). Kawasaki et al discloses the claimed invention as stated above except that the spring coupling element is not expressly disclosed as being pretensioned (claim 18). Uhl teaches that it is known to pretension a spring coupling element. It would have been obvious to one having ordinary skill in the art at the time the invention was made to pretension the spring coupling element, as taught by Uhl, in the starter of Kawasaki et al in order to apply desired torque from the rope reel to the pulley.

Conclusion

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
